Advantages

✓ BACTERIA PROOF 1,2,10
✓ SHOWERPROOF 1
✓ VIRAL BARRIER 10
✓ CONFORMS TO THE BODY 1,3,5,9
✓ REDUCES RISK OF BLISTERING 1,7
✓ REDUCES RISK OF SSIs 1,2,7
✓ EASY 1, 2, 3 APPLICATION 2,7
✓ EASY TO REMOVE 1,7
✓ COMFORTABLE TO WEAR 2,7
✓ VISUAL INSPECTION 1,7
✓ WIDE RANGE AVAILABLE
✓ REDUCES THE RISK OF MACERATION 3,7
✓ LATEX FREE

C-View Application

Remove the large central piece of protective paper from the Adhesive (1).

Hold the edge tabs (2), position the dressing centrally over the wound bed.

Press the exposed adhesive side of the dressing onto the skin.

Gently smooth the remaining edges of the dressing onto the skin, ensuring the dressing adheres well to the skin.

Once the dressing is secure, peel off the support layer (3) using the tabs provided.

Select your Dressing

Wound bed type: Exudate level

Necrotic: None to low
Infected: Low to moderate
Hemorrhagic: Wound depth
Granulating: Flat/shallow
Epithelialising: Deep/cavity

These icons can be used to aid dressing selection.

Removal

To gently remove C-View or C-View Post-Op dressings, use a peel and stretch technique. Gently peel and lift one corner of the dressing. Support the skin and stretch the dressing horizontally in the direction of the hair growth. Work across the dressing until the entire dressing is released from the skin.

Removal

To gently remove C-View or C-View Post-Op dressings, use a peel and stretch technique. Gently peel and lift one corner of the dressing. Support the skin and stretch the dressing horizontally in the direction of the hair growth. Work across the dressing until the entire dressing is released from the skin.

References:
C-View Post-Op combines the C-View film dressing with a soft, extensible and flexible hydrophilic foam pad to manage low to moderately exuding wounds. The film and pad work together, stretching and relaxing either with body movements or as oedema occurs and resolves; this ability minimises the potential for friction and blistering. Post-Op dressings provide the same protective barrier as regular C-View and can remain in place according to best practice guidelines or for up to seven days. Surgical wounds should be dressed and not be disturbed for 48 hours after the procedure (NICE guidelines). Post-Op dressings should be applied post-operatively, immediately after wound closure, but can also be used on minor non-surgical wounds.

✓ Reduces the risk of blistering
✓ Reduces the risk of SSIs
✓ Soft hydrophilic foam pad manages exudate
✓ Conformable and comfortable to wear
